

Daniel Chisasura

CYBER SECURITY GRADUATE | SOC | GRC | IT SECURITY | CLOUD SECURITY FOUNDATIONS

Western Australia | 0497 259 516 | dchisarura@gmail.com
linkedin.com/in/daniel-chisasura-a87b1147 | github.com/chisabyte | Available immediately | Open to relocation

PROFESSIONAL SUMMARY

Cyber Security graduate from Edith Cowan University with 2 years of commercial IT support experience and practical projects across SOC monitoring, SIEM analysis, vulnerability management, digital forensics, GRC, system hardening and technical documentation. Strong foundation in Splunk, NIST, ISO 27001, Essential Eight, Nessus/OpenVAS, Linux, Python/Bash, endpoint monitoring, LAN/WAN support and incident response playbooks. Seeking entry-level Cyber Security, SOC Analyst, GRC Analyst, IT Security, Cloud Security Support or security-aware IT Support roles.

ECU Cyber Security Graduate	2 yrs IT Support	Splunk + SIEM Labs	NIST / ISO / Essential Eight
Nessus + OpenVAS	Autopsy + FTK Imager	Linux Hardening	Python + Bash

TECHNICAL SKILLS

SOC / Security Operations Splunk, SIEM log analysis, alert triage, MITRE ATT&CK, NIST SP 800-61 playbooks	GRC / Risk Risk matrices, ISO 27001 Annex A, NIST CSF, Essential Eight, remediation roadmaps
Vulnerability + Hardening Nessus, OpenVAS, CVSS, Linux/NGINX hardening, CIS Benchmarks, TLS 1.3, security headers	Digital Forensics Autopsy, FTK Imager, disk image acquisition, timeline reconstruction, chain-of-custody reporting
Infrastructure + Support Windows, Linux, LAN/WAN, firewall rules, DNS, DHCP, TCP/IP, patching, backups, asset inventory	Scripting + Documentation Python, Bash, log parsing, anomaly alerting, technical reports, security awareness material

SELECTED CYBER SECURITY PROJECTS

SOC Analyst / Security Operations Lab

Built Splunk dashboards and triaged 50+ simulated alerts across phishing, brute-force, malware and network intrusion scenarios; mapped events to MITRE ATT&CK; and documented escalation logic.

Cyber Security Risk Assessment

Built a 20+ item risk matrix across 4 business units, mapped controls to ISO 27001 Annex A and NIST CSF, assessed Essential Eight maturity and produced a prioritised remediation roadmap.

Network Security and Web Server Hardening

Hardened 2 Linux/NGINX web servers using CIS Benchmark principles, TLS 1.3, HTTP security headers and least-privilege access; documented 15+ vulnerability findings using CVSS.

Digital Forensics Investigation

Acquired and analysed 3 forensic disk images using Autopsy and FTK Imager, examined 500+ logs/artefacts and produced evidence-focused reports with chain-of-custody documentation.

Incident Response Playbook Project

Documented 5 incident response playbooks aligned to NIST SP 800-61, covering containment, eradication and recovery steps for common attack scenarios.

Daniel Chisasura

PROFESSIONAL EXPERIENCE

IT Technician - Melta Creations, Cape Town

Apr 2011 - May 2013

- Provided first-line technical support for hardware, software and network issues across a multi-user environment, resolving 100+ tickets with consistent SLA focus.
- Assisted with LAN/WAN setup and monitoring, firewall rules, patch management and scheduled backups across 50+ endpoints.
- Monitored endpoints for potential security issues, escalated suspicious activity and produced incident logs for senior review.
- Maintained IT asset inventory and technical documentation to support audit readiness and operational continuity.
- Delivered user security awareness support covering password hygiene, phishing identification and safe browsing practices.

Project Member - Edith Cowan University Cyber Security Project

Apr 2023 - Jul 2023 | Western Australia

- Developed a structured cyber risk matrix, researched vulnerabilities and controls, and contributed to remediation recommendations.
- Collaborated in team reviews, presented findings and helped refine project documentation for clarity and practical security value.

EDUCATION

Bachelor of Science (Cyber Security) - Edith Cowan University, Western Australia - 2025
Diploma of Software Development - North Metropolitan TAFE - 2018
Certificate IV in Programming - North Metropolitan TAFE - 2018
Certificate III in Digital Media - North Metropolitan TAFE - 2016

DEGREE MAPPED TO JOB OUTCOMES

Area	Practical Skill	Roles Supported
Security Operations	SIEM analysis, alert triage, incident response playbooks	SOC Analyst, Security Analyst
GRC / Governance	ISO 27001, NIST CSF, Essential Eight, risk documentation	GRC Analyst, Risk Analyst
Network Security	Firewall rules, LAN/WAN, hardening, vulnerability remediation	IT Security Analyst, Network Support
Digital Forensics	Evidence handling, timeline reconstruction, forensic reporting	Forensic Analyst, Incident Response
Scripting	Python/Bash automation, log parsing, health checks	SOC Support, Cloud/Security Support

CERTIFICATIONS AND TRAINING

• Splunk Fundamentals 1 - Splunk - 2025	• SOC Level 1 Path - TryHackMe - 2025
• Introduction to Cybersecurity - Cisco Networking Academy - 2025	• Google IT Support Professional Certificate - Google / Coursera - 2025
• CompTIA Security+ - self-study / scheduled	• Microsoft SC-200 Security Operations Analyst - scheduled
• ITIL 4 Foundation - scheduled	

TARGET ROLES

SOC Analyst Level 1	Junior Cyber Security Analyst	GRC Analyst	IT Security Analyst
Vulnerability Analyst	Security-aware IT Support	Cloud Security Support	IAM Analyst

PROFESSIONAL STRENGTHS

- Clear communicator who can explain technical risks and support non-technical users.
- Strong documentation across risk assessments, incident logs, evidence handling and remediation reports.
- Security-focused IT foundation across endpoints, networks, users, patching, backups and access control basics.
- Available immediately; open to relocation and hybrid/remote roles across Australia.
